SUMMARY YEAR 2025

IMPORTANT EVENTS DURING THE YEAR 2025

- In February, a previous loan of 150,000 USD to FinTech Africa was converted into equity through a set-off issue. This increased MTI's ownership to 39.9%. On 6 February, MTI also signed a loan agreement of 200,000 USD with an existing shareholder to further invest and increase its ownership in FinTech Africa to 44.91%.
- Termination of the market maker service from Mangold Fondkommission that was announced in 2024 went in to effect on the 26th of March 2025
- On 27th August 2025, MTI participated in the Seed Round for Chanzi Holdings Limited and issued convertible debt note of USD 400 000. The convertible debt note to Chanzi Holdings Limited has a 3-year term or converts along with accrued interest in the event of a Series A round being conducted before the end of the term.
- On 27th August 2025, MTI raised a debt of USD 400 000 loan from an existing shareholder at an annual interest of 7% payable at the end of 36 months term.
- On 17th November 2025, MTI secured a USD 624 000 grant project from the Norwegian Agency for Exchange Cooperation (Norec). The project runs from January 2026 to January 2029 in collaboration with University of Agder, Norway. Of the USD 624,000, USD 524,000 is attributable to MTI Investment and its subsidiaries.

INVESTMENTS DURING THE YEAR

- MTI Investment AB acquired all the voting rights in TechBridge Invest AS at nominal value. A consequence of this transaction was that the ownership of the Kenyan subsidiary TechBridge Invest Africa was moved to direct ownership under MTI Investment AB
- TechBridge Invest AS transferred its 5.6% ownership in Pangea Angels, the holding entity of Kenyan startup Workpay, to MTI Investment AB as a mode of repayment of an existing loan.

DIVESTMENTS DURING THE YEAR

- All shares owned by MTI Investment in Zanrec AB were sold to a liquidation company for winding down of Zanrec AB and its subsidiaries.
- African Construction AS, the initial holding company for Ecohomes Ltd was wound up in November 2025

OTHER EVENTS JANUARY-DECEMBER 2025

- Starting FY 2025, shifted the reporting currency from EUR to SEK
- In May 2025 Lincoln Njiru assumed the position as CFO in MTI Investment. Lincoln is based in the company's Kenya office.
- 250,000 warrants were awarded to the CEO as an incentive programme voted for in the AGM in the Series 2025/2028A and with a strike price of SEK 1.50.
- The AGM resolved to implement an incentive programme for the Chairman consisting of 250,000 warrants of Series 2025/2028B with a strike price of SEK 1.50.

ABOUT MTI INVESTMENT

MTI Investment is an Africa focused investment company taking active ownership in high-quality small and medium enterprises capturing the continent's mega trends; a rapidly expanding middle class, urbanisation, and food security. MTI is currently operating two investment strategies. The growth portfolio aimed at building pre-seed stage businesses into profitable growth stories and an investment portfolio containing mature companies with established cash flows and growing Net Asset Value.

Our purpose-driven mindset guides us toward investing in businesses where the returns delivered to our shareholders are closely accompanied by sustainable job creation and long-term economic growth. By working actively with management teams and conducting a rigorous due diligence process, MTI's portfolio of companies safeguards strong governance structures, ensures a positive impact on societies and reduces the harm on fragile ecosystems.

HOW WE INVEST

Our investment approach at MTI Investment is underpinned by finding the highest quality businesses in the region. Through our multi-portfolio approach we are ensuring that we have enough time to evaluate a business before the investment decision is made and given a chance to develop weak areas in each business to ensure investment readiness.

Once we have invested, our post-investment support focus on scale through strategic advice, business development, access to external markets, and financial control. This active management is integral to creating an African center of excellence where we are delivering on our commitment to not only become the most trustworthy investor, but also owner.

In our sourcing we look for entrepreneurs and management teams that have deep sector knowledge, commitment to transparent governance structures and a long-term mindset. We look at our investments as partnerships where it's important that MTI can add value as an investor beyond capital. This leads us to invest in sectors and value chains where we have sufficient expertise to bring outside market linkages, expansion advice, and risk control.

We believe entrepreneurship can come from anyone who can identify a problem that a customer is willing to pay and shows the right characteristics to take on the challenge of building a business. This leads us to look for businesses in both urban and rural settings, academic background or not which is enabled by our presence across the region.

Purpose - Enable long-term growth of African businesses to drive inclusive economic development.

Vision - Being the most trustworthy investor and owner in African businesses

Mission - Creating an African center of excellence for business development and post-investment support to build the strongest portfolio of African businesses to deliver impactful returns for MTI shareholders

Our Core Values

Mindful
Transparent
Integrity
Agile
Curious
Teamwork

SOLVING A CRITICAL BOTTLE-NECK FOR A CONSUMER DRIVEN VALUE CHAIN

We look for founders with domain expertise and experience from the industry who are looking to solve problems influencing the affordability and quality of products and services provided to the wider populations.

STRONG GOVERNANCE STRUCTURES

Any business associated with MTI undergoes a rigorous due diligence of health and safety standards, environmental impact, anti-corruption and transparency. We perform regular internal controls to ensure compliance with these standards.

SCALABLE SOLUTIONS APPLYING LOW-COST TECHNOLOGIES

With broad availability of AI, mobile connectivity and high degree of smartphone penetration we invest in businesses that utilises these tools to quickly reach more customers and sees it as a natural part of the growth journey

GRIT

We believe exceptional founders are the ones that not just working hard, it is the intersection of long-term passion and extreme persistence where consistency is prioritised over intensity and the mindset of doing more with less dominates

ADDITIONAL INFORMATION

GROUP STRUCTURE

Other Roles: Supplement Board member in East African Food AB.

REPORT FROM THE DIRECTORS 2025

The Board of Directors and CEO of MTI Investment AB (publ), 559487-1245, with registered office in Stockholm, hereby submits the annual report for 2025. The annual report is prepared in Swedish kronor (SEK), and all reported amounts are in SEK unless otherwise stated. Information in parentheses refers to the previous year.

INFORMATION ABOUT THE BUSINESS

MTI Investment AB is a Nordic investment company founded in 2014 by a team with extensive experience from emerging markets, with the aim of investing in African small and medium-sized enterprises ("SMEs") with high value-added potential. The business idea is to invest in small and medium-sized enterprises ("SMEs") run by skilled and committed entrepreneurs in Africa. By being a long-term owner and pursuing an active ownership approach, MTI helps portfolio companies grow faster and become more profitable. The company primarily invests in innovative and scalable companies with the potential to create significant positive social impact. The company's business purpose is to directly own, acquire and manage securities, provide capital to SMEs and conduct other related activities. The company is headquartered in Stockholm, Sweden.

By providing both capital and expertise, MTI contributes to creating sustainable businesses and new jobs in the region, which in the long term contributes to reducing poverty. MTI has access to leading expertise in finance, law, business development and technology, which is made available to the portfolio companies.

MTI's investment portfolio consists of core holdings and secondary holdings. The core holdings constitute a larger part of the portfolio, while the secondary holdings are smaller investments. The core portfolio is owned through intermediate holding companies but can be simply described as FinTech Africa, Shambani Milk and Tanswed.

MTI's share has been listed on Nasdaq First North since December 21, 2021.

SIGNIFICANT EVENTS DURING THE YEAR 2025

- In February, a previous loan of USD 150,000 to FinTech Africa was converted into equity through a set-off issue. This increased MTI's ownership to 39.9%. On February 6, MTI also entered into a USD 200,000 loan agreement with an existing shareholder to further invest and increase its ownership in FinTech Africa to 44.91.
- The termination of the liquidity guarantee service from Mangold Fondkommission, which was announced in 2024, took effect on March 26, 2025.
- On August 27, 2025, MTI participated in a seed round for Chanzi Holdings Limited and issued a convertible debenture of USD 400,000. The convertible debenture has a term of three years or is convertible,

together with accrued interest, in the event of a Series A round that is completed before the end of the term.

- On August 27, 2025, MTI raised a loan of USD 400,000 from an existing shareholder at an annual interest rate of 7%, with payment at the end of a 36-month period.
- On November 17, 2025, MTI received a grant-funded project of USD 624,000 from the Norwegian Agency for Exchange Cooperation (Norec). The project runs from January 2026 to January 2029 in collaboration with the University of Agder, Norway. Of the total amount of USD 624,000, USD 524,000 is attributable to MTI Investment and its subsidiaries.

NET SALES AND PROFIT

The Group's net sales amounted to SEK 292 thousand (SEK 1,832 thousand). The decrease is mainly explained by the fact that the majority of the Group's revenue consisted of grant revenue during the year, which is reported in the category other revenue.

EBITDA amounted to -5,119 thousand SEK (-9,451 thousand SEK). The improvement is primarily due to cost optimization and increased revenues from alternative revenue streams, including contributions from the NORAD and NOREC projects.

The result for the year amounted to -5,598 thousand SEK (-15,103 thousand SEK). The reduced net loss is mainly attributable to cost optimization and increased income from alternative revenue streams, including contributions from the NORAD and NOREC projects.

FINANCIAL POSITION AND CASH FLOW

Total equity at the end of the period amounted to SEK 2,445 thousand (SEK 8,879 thousand). The equity ratio amounted to 8%.

Cash and cash equivalents amounted to SEK 3,901 thousand as of December 31, 2025, compared to SEK 7,752 thousand as of December 31, 2024. This is due to a delayed payment of NORAD funds for year 2, half year 2 of the project.

The total cash flow amounted to -3,433 thousand SEK (6 thousand SEK).

STAFF

The parent company has one employee. The CEO and CFO are employees of the Kenyan subsidiary.

THE STOCK

MTI Investments' share has been listed on Nasdaq First North

FÖRVALTNINGSBERÄTTELSE 2025

since December 2021. The share capital as of December 31, 2025 amounted to SEK 3,828,821, divided into 16,666,614 shares.

The two largest shareholders at the end of the year were Holdingselskabet Claus Jørgensen II ApS and Engström Investment Holding AB.

SIGNIFICANT RISKS AND UNCERTAINTIES

MTI Investment is exposed to currency risks regarding potential exchange rate changes in foreign currencies, which may affect the company's income statement and balance sheet as well as the value of its assets and liabilities.

The exposure primarily relates to the parent company, MTI Investment AB, which had the euro as its functional currency up to and including the 2024 financial year and from 2025 has Swedish kronor as its functional currency.

Currency risk arises when the majority of revenues are denominated in TZS (Tanzanian shilling) or USD (US dollars), while the majority of costs are denominated in SEK (Swedish kronor) and KES (Kenyan shilling).

FUTURE CAPITAL NEEDS

The board assesses that existing cash and cash equivalents, including contributions from the NORAD project, are sufficient to operate the business through 2026.

The Company is continuously evaluating new investment opportunities and alternative revenue streams. To the extent such opportunities are realized, additional external financing may be required.

POLITICAL RISK

The company's operations are subject to general political and societal risks in the countries where it operates, primarily Tanzania and Kenya. These include inflation, deflation and potential government interventions.

INVESTMENT-RELATED RISKS

MTI Investment has made and intends to make investments in unlisted companies. The potential increase in value in such investments can be large, but at the same time involves a high level of risk. Therefore, there is no guarantee of financial success or return.

FINANCIAL DEVELOPMENT IN PORTFOLIO COMPANIES

MTI Investment has invested significant amounts in the development of portfolio companies' products and services.

If these products and services are not in demand, lack competitiveness or if development investments do not fulfill their intended functions, there may be a need for impairments and additional development costs.

PROPOSAL FOR PROFIT ALLOCATION

The following is available to the Annual General Meeting in the parent company (SEK):

- Retained earnings: 4,639,405
- Result for the year: -2,282 3 78
- Total: 2,357,027

The board proposes that the amount be carried forward to a new account.

The company's results and financial position in other respects are presented in the following income statement, balance sheet, and cash flow statement, together with accompanying notes.

DIVIDEND

The Board of Directors proposes to the Annual General Meeting that no dividend be paid for the financial year 2025.

Notes

Note 1 Accounting and valuation principles

General information

The annual report and consolidated accounts have been prepared in accordance with the Annual Accounts Act and BFNAR 2012:1 Annual Report and Consolidated Accounts (K3).

Monetary receivables and liabilities in foreign currencies have been valued at the closing rate. Non-monetary items are not translated but are reported at the rate at the time of acquisition. Exchange gains and losses on operating receivables and operating liabilities are reported in operating profit, while exchange gains and losses on financial receivables and liabilities are reported as financial items.

During the financial year 2025, both the Group and the Parent Company have changed their reporting currency from Euro to Swedish kronor. Historical periods have been adjusted by recalculating balance sheet items to the 2024 closing rate while income statement items have been revalued to the average rate for 2024.

The accounting principles are unchanged compared to the previous year.

The parent company and the Group apply the same accounting principles except in the cases stated below under the section "Accounting principles in the parent company".

Revenue recognition

Revenue has been recognized at the fair value of what has been received or will be received and is reported to the extent that it is probable that the economic benefits will flow to the company and the revenue can be calculated reliably.

When selling goods, income is normally recognized as revenue when the significant benefits and risks associated with ownership of the goods have been transferred from the company to the buyer.

The Group recognizes revenue from grants related to certain projects. The grants are intended to cover costs that arise during specific project periods, and are recognized as revenue in the period in which the cost that the grant is intended to cover arises. Revenue is recognized when it is probable that the grant will be received and that the company will meet the conditions that are consistent with the grant. Grants received that have not yet been used in a project are recognized as a liability, classified as deferred revenue in the balance sheet at the rate at which the grants have been received in advance. Accrued income related to the grant is recognized as revenue in the income statement and accrued revenue as a receivable in the balance sheet when the cost has been incurred, but payment for the grant has not been received.

Compensation in the form of interest, royalties or dividends is recognized as income when it is probable that the company will receive the economic benefits associated with the transaction and when the income can be measured reliably.

Interest is recognized as income using the effective interest method. Royalty is accrued in accordance with the economic significance of the agreement in question. Dividends are recognized as income when the company's right to payment is assured.

Consolidated financial statements

Consolidation method

The consolidated financial statements have been prepared according to the acquisition method. This means that the identifiable assets and liabilities of acquired businesses are reported at market value according to the acquisition analysis. If the acquisition value of the business exceeds the estimated

market value of the expected net assets according to the acquisition analysis, the difference is reported as goodwill.

Subsidiary

The consolidated financial statements include, in addition to the parent company, all companies in which the parent company directly or indirectly holds more than 50% of the voting rights or otherwise has controlling influence and thus has the right to shape the company's financial and operational strategies with the aim of obtaining economic benefits.

A subsidiary's income and expenses are included in the consolidated financial statements from the date of acquisition until the date when the parent company no longer has a controlling influence over the subsidiary.

Associated companies and Jointly controlled entities

Associated companies are companies in which the company has significant but not controlling influence. Significant influence is normally considered to exist when the company owns at least 20% but not more than 50% of the votes in another company.

A jointly controlled entity is a legal entity over which two or more parties exercise joint control under an agreement.

Accounting for associated companies

Holdings in associated companies are reported in the consolidated accounts using the equity method. This means that an acquisition analysis is prepared and any surplus or deficit values are identified. The consolidated value of the share is affected during the holding period by amortization of surplus values or reversal of deficit values. The share value is also affected by the share of profit in the associated company during the holding period, adjusted for internal profits and other consolidated adjustments. Dividends received reduce the consolidated value.

The share of the associated company's profit after tax is reported on a separate line and affects the Group's operating profit.

Transactions between group companies

Intra-group receivables and liabilities, transactions between group companies and unrealized profits are eliminated in full. Unrealized losses are also eliminated unless the transaction corresponds to an impairment requirement.

Changes in internal profit during the financial year have been eliminated in the consolidated income statement.

Translation of foreign subsidiaries

The financial statements of foreign subsidiaries have been translated using the current exchange rate method. All items in the balance sheet have been translated at the closing rate. All items in the income statement have been translated at the average rate during the financial year. Any differences that arise are recognized directly in equity.

Goodwill

Goodwill is the difference that arises if the acquisition value of the acquired entity is higher than the value of the acquired entity's net assets. At the time of acquisition, the goodwill arising is reported as an asset in the balance sheet. Goodwill is reported at acquisition value less accumulated depreciation and any impairment.

Fixed assets

Intangible and tangible fixed assets are reported at cost less accumulated depreciation according to plan and any impairment losses.

Depreciation is calculated on a straight-line basis over the expected useful life, taking into account any significant residual value. The following depreciation percentages are applied:

Intangible fixed assets

Rental properties	5 years
Goodwill	5 years

The amortization period for goodwill is calculated based on the period during which the item is expected to generate economic benefits.

Tangible fixed assets

Machinery and other technical facilities	3-8 years
Equipment, tools and installations	3-8 years

Financial instruments

Financial instruments are measured at cost. The instrument is recognized in the balance sheet when the company becomes a party to the contractual terms of the instrument. Financial assets are derecognized when the right to receive cash flows from the instrument has expired or has been transferred and the company has transferred substantially all the risks and rewards of ownership. Financial liabilities are derecognized when the obligations are settled or otherwise extinguished.

Other long-term securities holdings

Investments in securities acquired with the intention of being held long-term have been reported at their acquisition value. An assessment is made on each balance sheet date for any impairment.

Accounts receivable/current receivables

Accounts receivable and short-term receivables are reported as current assets at the amount expected to be collected after deduction of individually assessed doubtful receivables.

Loans and accounts payable

Loan liabilities and accounts payable are initially recognized at cost less transaction costs. If the reported amount differs from the amount to be repaid at maturity, the difference is accrued as interest expense over the term of the loan using the instrument's effective interest rate. This ensures that the reported amount and the amount to be repaid at maturity are the same.

Offsetting of financial receivable and financial liability

A financial asset and a financial liability are offset and reported with a net amount in the balance sheet only when there is a legal right of set-off and when a settlement with a net amount is intended to occur or when a simultaneous disposal of the asset and settlement of the liability is intended to occur.

Impairment testing of financial fixed assets

At each balance sheet date, an assessment is made as to whether there are indications of impairment of any of the financial assets. Impairment is made if the decline in value is deemed to be permanent and is tested individually.

Leasing agreement

Lessee

All leases are classified as either finance or operating leases. A finance lease is a lease under which substantially all the risks and rewards incidental to ownership of an asset are transferred from the lessor to the lessee. An operating lease is a lease that is not a finance lease.

Lease payments under operating leases, including increased initial rent but excluding expenses for services such as insurance and maintenance, are recognized as an expense on a straight-line basis over the lease term.

Inventory

The inventory has been valued at the lower of its acquisition value and its net realizable value on the balance sheet date. Net realizable value refers to the estimated selling price of the goods less selling expenses. The chosen valuation method means that obsolescence in the inventory has been taken into account.

Income taxes

Total tax consists of current tax and deferred tax. Taxes are recognized in the income statement, except when the underlying transaction is recognized directly against equity, in which case the related tax effects are recognized in equity.

Current tax

Current tax refers to income tax for the current financial year and the portion of income tax from previous financial years that has not yet been reported. Current tax is calculated based on the tax rate in effect on the balance sheet date.

Deferred tax

Deferred tax is income tax that relates to future financial years as a result of past events. Accounting is carried out according to the balance sheet method. Under this method, deferred tax liabilities and deferred tax assets are recognised on temporary differences that arise between the book and tax values of assets and liabilities, as well as for other tax deductions or deficits.

Deferred tax assets are reported net of deferred tax liabilities only if they can be paid in a net amount. Deferred tax is calculated based on the tax rate in effect on the balance sheet date. The effects of changes in applicable tax rates are recognized in the income statement in the period in which the change is enacted. Deferred tax assets are reported as financial assets and deferred tax liabilities as provisions.

Deferred tax assets relating to loss carryforwards or other future tax deductions are recognized to the extent that it is probable that the deductions can be offset against future taxable profits.

Due to the connection between accounting and taxation, the deferred tax liability attributable to untaxed reserves is not reported separately.

Employee benefits

Employee benefits refer to all forms of compensation that the company provides to employees. Short-term benefits include salaries, paid vacation, paid absence, bonuses and post-employment benefits (pension). Short-term benefits are recognized as an expense and a liability when there is a legal or informal obligation to pay a benefit as a result of a past event and a reliable estimate of the amount can be made.

Post-employment benefits

The company only has defined contribution pension plans. Defined contribution plans are plans where fixed contributions are paid and there are no obligations to pay anything further, beyond these contributions.

Expenses for defined contribution plans are recognized as an expense during the period in which the employees perform the services that form the basis for the obligation.

Termination benefits, to the extent that the compensation does not provide the company with any future economic benefits, are only recognized as a liability and an expense when the company has a legal or informal obligation to either:

- a) terminate the employment of an employee or a group of employees before the normal time for termination of employment, or
- b) provide termination benefits through an offer to encourage voluntary redundancy. Termination benefits are only recognised when the company has a detailed plan for the termination and no realistic possibility of cancelling the plan.

Cash flow statement

The cash flow statement is prepared using the indirect method. The reported cash flow only includes transactions that have resulted in receipts or payments.

In addition to cash, the company classifies as liquid assets available balances with banks and other credit institutions as well as short-term liquid investments that are listed on a market place and have a maturity of less than three months from the date of acquisition. Changes in restricted funds are reported in investing activities.

Key figure definitions

Net sales

Main operating income, invoiced costs, ancillary income and income adjustments.

Profit after financial items

Profit after financial income and costs but before appropriations and taxes.

Balance sheet total

The company's total assets.

Equity ratio (%)

Adjusted equity (equity and untaxed reserves with deduction for deferred tax) as a percentage of balance sheet total.

Estimates and assessments

The preparation of financial statements and the application of accounting policies are often based on management's judgments, estimates and assumptions that are considered reasonable at the time the judgment is made. Estimates and assumptions are based on historical experience and a number of other factors that are considered reasonable under the circumstances. The results of these are used to assess the carrying amounts of assets and liabilities that are not otherwise clearly apparent from other sources. The actual outcome may differ from these estimates and judgments. Estimates and assumptions are reviewed regularly.

No significant sources of uncertainty in estimates and assumptions at the balance sheet date are considered to pose a significant risk of a material adjustment to the carrying amounts of assets and liabilities during the next financial year.

Accounting principles in the parent company

The accounting principles in the parent company are consistent with the accounting principles stated above in the consolidated financial statements except in the cases below.

Financial assets and liabilities

Participations in subsidiaries, associated companies and jointly controlled entities

Participations in subsidiaries, associated companies and jointly controlled entities are reported at cost less accumulated impairment losses. In addition to the purchase price, the cost includes expenses directly attributable to the acquisition.

Group contributions and shareholder contributions

Group contributions that have been received/provided are recognized as an appropriation in the income statement. The group contributions received/provided have affected the company's current tax.

Shareholder contributions made without issued shares or other equity instruments being received in exchange are reported in the balance sheet as an increase in the carrying amount of the share.

Note 30 Transactions with related parties

The Group

During the first half of 2025, Torbjörn Jacobsson, a major shareholder in Fintech, invoiced Africa AB, SEK 62,500 for consulting services through Fintech Afrika AB. The agreements have since expired and have not been renewed.

MTI Investment AB received loans of USD 200,000 in March 2025 and USD 400,000 in July 2025 from its largest shareholder, Holdingselskabet ClausJørgensen II ApS .

In September 2025, MTI Investment AB paid USD 11,800 to Yardhouse Capital Group, a shareholder representative, for organizing an investor conference.

Note 32 Significant events after the end of the financial year

The Group

In 2025, Techbridge Invest took over Africa Ltd. role as lead partner in a NORAD-funded project. This means that Techbridge Invest AS no longer conducts any operations and is therefore only burdened with unnecessary costs. The company's equity has been used up and there are no continued operations. The shareholders and the board have therefore decided to liquidate the company in order to further streamline the group structure and minimize overheads.

Note 33 Contingent liabilities

The Group

The Group wishes to disclose a contingent liability regarding the portion of the contributions that has been recognized as revenue during the 2025 financial year (approximately SEK 3.3 million) and that will be reported to the contributor in 2026. For these contributions, reporting obligations remain according to the contribution agreements, and the contributions are thus associated with remaining commitments.
