

JONDETECH SENSORS AB SELECTED FOR PROTOTYPE DEVELOPMENT BY A LEADING TIER 1 COMPANY IN SOUTH KOREA

JonDeTech Sensors AB (publ) is proud to announce its selection by one of the world's leading Tier 1 companies in South Korea to develop three new prototypes (for a potential mass market launch). This collaboration reflects the high demand and confidence placed in JonDeTech's innovative sensor technology by significant global players.

This step in the evaluation phase will help us as a company to develop and to adapt to a mass market infrastructure that Tier 1 customers can offer and demand.

Details about the prototypes remain confidential, underlining the strategic nature of this collaboration and the advanced technology involved. This project is a pivotal step in the evaluation phase that confirms the high quality and performance of JonDeTech's sensors. The products being evaluated and the prototypes being built are both with JIRS40 and JIRS30 sensors.

"This is a tremendous opportunity, and we are honored to be part of this project," said Leif Borg, CEO of JonDeTech. "The fact that JonDeTech is involved in this evaluation phase affirms the quality and performance of our sensors. With this opportunity, JonDeTech will tailor its activities and strategy to accommodate this new level of inquiries."

Leif Borg further added, "I am incredibly proud of our team and our company as a whole for having secured this opportunity with one of the world's largest companies. We have excellent initiatives underway in the field which we believe will result in building a mass market. This press release and opportunity are a testament to our correct go-to-market strategy, and I look forward to sharing more positive news soon."

JonDeTech is committed to adapting its operations to meet the surge in demand and leveraging this collaboration to further enhance its position in the global sensor technology market.

About JonDeTech

JonDeTech is a supplier of sensor technology. The company markets a portfolio of IR sensor elements based on proprietary nanotechnology and silicon MEMS. The nanoelements are extremely thin, built-in flexible plastic, and can be manufactured in high volumes at a low cost, which opens up for a variety of applications, such as temperature and heat flow measurements, presence detection, and gas detection. The company is listed on Nasdaq First North Growth Market.

Mangold Fondkommission AB is the company's Certified Adviser.
