

AAC Clyde Space wins 6.1 MSEK order from OHB

2022-08-17 AAC Clyde Space AB (publ)

The small satellite company AAC Clyde Space has won a 584 kEUR (approx. 6.1 MSEK) order for Sirius computers and Starbuck power systems from OHB Sweden. The units will be part of the core avionics for a new InnoSat-class satellite.

The order is expected to be delivered middle of 2023.

The AAC Clyde Space's Sirius computer and the Starbuck Mini power system were originally developed for the first InnoSat satellite, as part of a programme financed by the Swedish National Space Agency. They are now used extensively in a variety of space missions, offering industry leading, robust performance for small and medium sized satellites.

"Sirius and Starbuck are increasingly popular as the standard for small satellite models, combining capability, quality, fast delivery and a very competitive price. We are delighted to see our products once again powering an InnoSat class satellite", said AAC Clyde Space **CEO Luis Gomes**.

ABOUT AAC CLYDE SPACE

AAC Clyde Space specialises in small satellite technologies and services that enable businesses, governments and educational organisations to access high-quality, timely data from space. Its growing capabilities bring together three divisions:

Space Data as a Service – delivering data from space directly to customers

Space missions – turnkey solutions that empower customers to streamline their space missions

Space products and components – a full range of off-the-shelf and tailor-made subsystems, components and sensors

AAC Clyde Space aims to become a world leader in commercial small satellites and services from space, applying advances in its technology to tackle global challenges and improve our life on Earth.

The Group's main operations are located in Sweden, the United Kingdom, the Netherlands, South Africa and the USA, with partner networks in Japan and South Korea.

AAC Clyde Space's shares are traded on Nasdaq First North Premier Stockholm. Erik Penser Bank AB is the Certified Adviser. The share is also traded on the US OTCQX- market under the symbol ACCMF.
