

Wyld Networks to exhibit at LoRaWAN World Expo in Paris with partner Eutelsat

On July 6th and 7th, Wyld Networks will exhibit at the LoRaWAN World Expo in Paris alongside satellite partner Eutelsat.

LoRaWAN World Expo is the largest LoRaWAN conference and one of the most significant annual events in the IoT Calendar. The event hosts IoT's leading organisations exhibiting technologies that will increase global sustainability, security, and efficiencies for the planet and its people.

Wyld will be showing off our new Wyld Connect solutions, in partnership with Eutelsat, and engaging in talks and panels. The Expo is also a great opportunity to network with enterprises, device makers, system integrators, distributors, developers, solution providers, educational institutions, IoT alliances, influencers, and many more.

LoRaWAN is enabling digital transformation as the only Low Power Wide Area Network (LPWAN) able to scale and combine existing terrestrial networks with direct sensor-to-satellite connectivity. Wyld and partner Eutelsat will deliver the network capacity needed to ignite exponential growth in global IoT usage, capturing a wide array of new data sources from anywhere on the planet.

“LoRaWAN World Expo is the flagship event for LoRaWAN IoT,” says Luc Perard, Head of IoT at Eutelsat. “We are excited to be exhibiting with our partner Wyld Networks as we look to accelerate massive global adoption of IoT.”

“Wyld are delighted to share a stand with our partner Eutelsat,” says Alastair Williamson, CEO of Wyld Networks, “and are looking forward to engaging with the global LoRaWAN IoT community at its most important annual gathering.”
