PCI Certification

EYE World AB (publ): EYE World AB Renews Unique PCI Certification

EYE World AB is proud to announce today that we have renewed our PCI certification for an additional 12 months. This represents an important milestone for the company and a strong quality mark for our services.

Unlike other players in the market, we are **unique as a cybersecurity company holding PCI certification**. This certification grants us the exclusive right to store and manage **sensitive credit card and financial data** in full compliance with the highest international security standards.

Today, our systems hold more than **ten years of collected data**, including credit card information and financial history. With this renewed certification, we continue to provide our partners and customers with the assurance that their most sensitive information is protected at the highest possible level.

For investors and shareholders, this renewal reinforces EYE's **unique position in the market**. The PCI certification is not just a document – it is a guarantee that opens doors to more partnerships, larger business opportunities, and long-term trust from our customers.

In short: **other companies are not permitted to store this type of data – but we are.**

Fredrik Björklund, CEO of EYE World AB, comments:

"I would like to extend my sincere thanks to our Security and Technical teams, led by our CSO Martin Vallée, for making this renewal possible. Their work is critical in ensuring that we continue to deliver world-class security and trust to our customers and partners."

About EYE World

Eye World AB (publ) (<https://eye.world>), founded in 2015, is one of Northern Europe's leading and fastest-growing providers of SaaS solutions in Cyber Security. We are your complete partner and One Stop Shop for digital security, offering a unique AppStore that brings together 13 powerful services under one roof. Our partners can easily select the solutions that fit their business model and seamlessly offer them to their end customers.

Eye World delivers innovative business solutions in IT security, privacy protection, and advanced AI-based data solutions. Our products are specifically designed for the B2B market, with a focus on demanding industries such as banking and finance, insurance, telecom, and hosting. We help companies across Europe protect their digital assets and stay ahead of cyber threats-today and in the future.
