Seinäjoki, Finland 2.2.2024

Eevia Health Plc received a 112 KSEK / 10 KEUR sales order for a Bilberry extract product.

Eevia Health Plc's ("Eevia" or "The Company") has received a 10 KEUR sales order from a US company for Feno-Myrtilus 25 organic, an organically certified bilberry extract,

The customer is a medium-sized US brand holder with distribution throughout North America. The sales value to Eevia of this new order is kEUR 10 and the product is in stock. The product is Eevia's branded ingredient **Feno-Myrtilus® 25 Organic**, which is a highly concentrated and organically certified bilberry extract with 25% anthocyanins.

"It is the first order from this customer. Although the order is small, we are a bit excited, because the business came via one very well-known independent product formulator, who is kind of an "industry influencer", and who formulates products for several large brands. We first met him in Las Vegas in October 2023, so the sales cycle was not that long. He is excited about our polyphenol products and may include our ingredients in products for other brands," states Anna-Maija Vanhatalo, Sales Manager at Eevia Health.

The order is expected to be followed by further repeat orders in the future.

INFORMATION ABOUT EEVIA HEALTH PLC

Eevia Health Plc, founded in March 2017, addresses significant health problems with bioactive compounds extracted from plant materials. The materials are primarily wild harvested from the pristine Finnish and Swedish forests near or above the Arctic Circle. The extracts are sold B2B as ingredients to dietary supplements and food brands globally. These global brands utilize the ingredients in their consumer product formulas.

Eevia Health is a manufacturer of 100% organically certified plant extracts. Although a significant product, Elderberry extract, is made from cultivated berries, most of Eevia's other raw materials, such as bilberry, lingonberry, chaga-mushroom, and pine bark, are wild-harvested in a sustainable fashion.

Eevia Health operates a modern green-chemistry production facility in Finland. Manufacturing natural ingredients near the raw material harvest areas, Eevia offers a short value chain with an environmentally friendly carbon footprint, competitive pricing, and extreme transparency. Eevia listed its shares at Spotlight Stock Market in Sweden in June 2021, with the short name (ticker) [EEVIA](#).
