Eevia Health Plc receives a renewed Kosher certificate

Eevia Health Plc, ("Eevia" or "The Company"), has re-established its Kosher certification. The Jewish Community of Helsinki has validated Eevia's Kosherization and certified the Kosher and Parve status of the company products.

The Kosher certification verifies that the ingredients, and production processes, including all machinery, and/or food-service processes, comply with the standards of Jewish dietary law. This means Eevia Health follows a strict policy of Kosher food laws and can assure high quality and safe products. The Parve status confirms that the products are not of meat or milk origin.

Eevia had earlier a Kosher certification from OK Kosher in New York, but this certification was discontinued for some period. After several customer requests, Eevia re-established the procedures necessary to comply with Kosher and engaged with the Jewish Community of Helsinki.

Food products certified as Kosher are consumed not only by followers of Judaism but also by followers of Islam, vegetarians, and consumers who place a high priority on food safety. Kosher certification creates therefore clear value for certain key customers and Eevia expects to receive some new orders and sales contracts because of the re-certification.

INFORMATION ABOUT EEVIA HEALTH PLC

Eevia Health Plc, founded in March 2017, addresses significant health problems with bioactive compounds extracted from plant materials. The materials are primarily wild harvested from the pristine Finnish and Swedish forests near or above the Arctic Circle. The extracts are sold B2B as ingredients in dietary supplements and food brands globally. These global brands utilize the ingredients in their consumer product formulas.

Eevia Health is a manufacturer of 100% organically certified plant extracts. Although a significant product, Elderberry extract, is made from cultivated berries, most of Eevia's other raw materials, such as bilberry, lingonberry, chaga-mushroom, and pine bark, are wild-harvested in a sustainable fashion.

Eevia Health operates a modern green-chemistry production facility in Finland. Manufacturing natural ingredients near the raw material harvest areas, Eevia offers a short value chain with an environmentally friendly carbon footprint, competitive pricing, and extreme transparency. Eevia listed its shares at Spotlight Stock Market in Sweden in June 2021, with the short name [EEVIA](#).
