Unibap receives a large SpaceCloud order for a satellite constellation

Unibap AB (publ) has received an order from an emerging European smallsat integrator to deliver payload data processing units for a satellite constellation, commissioned by a European authority. Unibap's solution is based on the SpaceCloud iX5-family and includes software and hardware suitable for intelligent on-orbit edge computing. The order value is 1.7 MEUR with deliveries during 2023 up until Q2 2024. This order is the first part of a signed agreement with a total value of 6.2 MEUR. Remaining volume can be authorized in two steps, during 2023 and 2024, with deliveries 2024 and 2025, based on call-offs from the end customer.

- We are very pleased to take SpaceCloud to the next level in a European satellite constellation. This is in line with our communicated strategy and our plans to ramp up our production capacity during 2023. This is a significant milestone for the company, says Johan Åman, CEO.
