Eevia Health Plc releases a new white paper on Feno-Myrtillus® Organic, Eevia's organic bilberry extract product line

Eevia Health Plc ("Eevia" or "The Company") has released a white paper featuring the Feno-Myrtillus® Organic, an organically certified and trade-name protected product line of bilberry extract.

The white paper is the first of two parts. The first white paper provides a general overview of the health ingredient **Feno-Myrtillus® 36 Organic**, which is a highly concentrated and organically certified bilberry extract with 36% anthocyanins.

The second white paper to be released soon, does a deep dive into the science substantiating the health benefits to humans from consuming a standardized bilberry extract, including positive effects on eye health and metabolic conditions, and a review of approved health claims of the extract in various jurisdictions.

INFORMATION ABOUT EEVIA HEALTH PLC

Eevia Health Plc, founded in March 2017, addresses significant health problems with bioactive compounds extracted from plant materials. The materials are primarily wild harvested from the pristine Finnish and Swedish forests near or above the Arctic Circle. The extracts are sold B2B as ingredients to dietary supplements and food brands globally. These global brands utilize the ingredients in their consumer product formulas.

Eevia Health is a manufacturer of 100% organically certified plant extracts. Although a significant product, Elderberry extract, is made from cultivated berries, most of Eevia's other raw materials, such as bilberry, lingonberry, chaga-mushroom, and pine bark, are wild-harvested in a sustainable fashion.

Eevia Health operates a modern green-chemistry production facility in Finland. Manufacturing natural ingredients near the raw material harvest areas, Eevia offers a short value chain with an environmentally friendly carbon footprint, competitive pricing, and extreme transparency. Eevia listed its shares at Spotlight Stock Market in Sweden in June 2021, with the short name (ticker) [EEVIA](#).
